

How to Download & Set-Up the SaskAlert App

1. To find and download the app from the app store, search for "SaskAlert" or "Emergency Alerts Saskatchewan."
2. When you open the app for the first time, you will be prompted to allow for notifications from SaskAlert. Select **yes**.
3. You will be taken to the main screen of the SaskAlert app. Start by setting up your settings as shown below.

Main Screen

By default, you will not receive alerts when you first download the app. To receive alerts for any location, you need to refine your setting. Start by touching **Settings**.

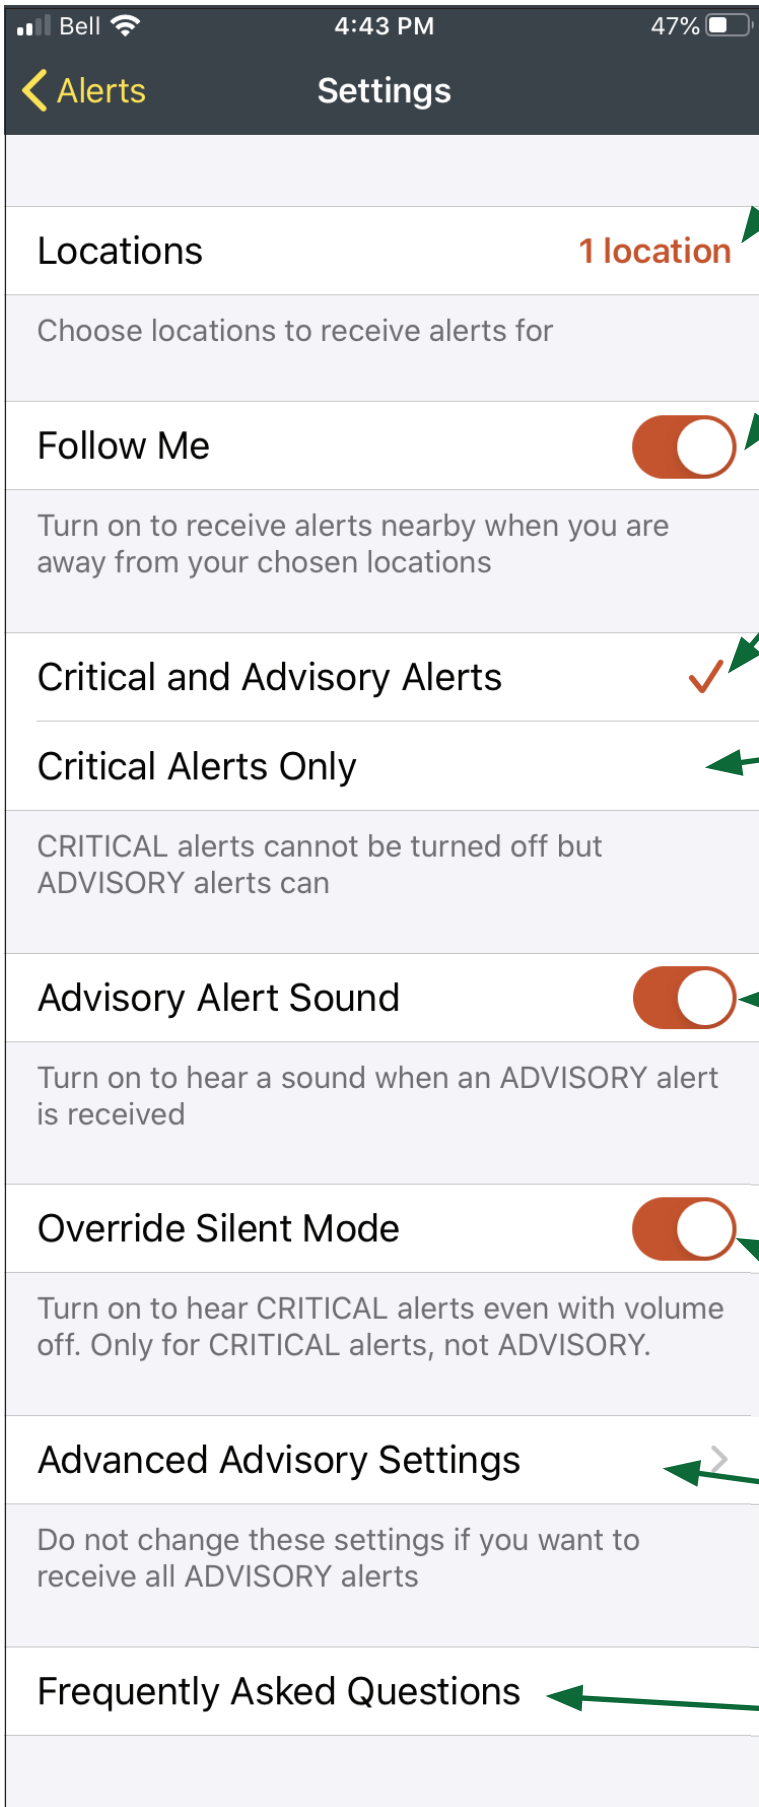

Alerts will display for the locations you have selected.

Alerts are grouped into the following categories, with the most recent alert displayed first in each category:

- **Critical Alerts** appear at the top of the screen with a red icon.
- **Emergency Advisory Alerts** are identified second with a yellow icon.
- **Broadcast Test Alerts** will also appear on this screen with a green icon.

All cancelled alerts will display in this area for 24 hours.

If you want to view past alerts, click **View Archived Alerts** and you will be taken to the SaskAlert website.

Choose **Locations** to take you to the next screen in order to select the whole province or individual areas.

Switching **Follow Me** to **On** will allow you to receive alerts nearby when you are away from your chosen locations.

When the app is downloaded, you will receive **Critical and Emergency Advisory** alerts by default. This selection is shown by a checkmark beside **Critical and Advisory Alerts**.

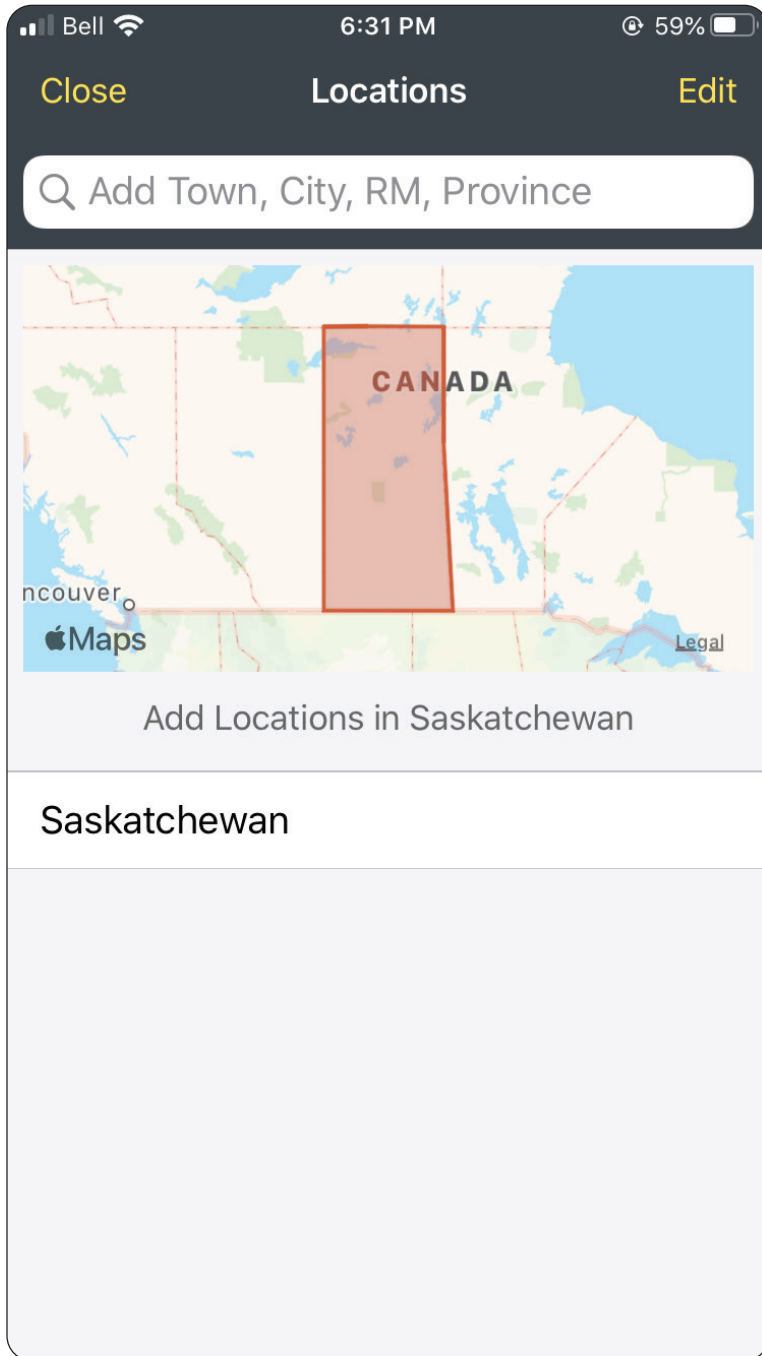

If you only want to receive critical alerts, click in **Critical Alerts Only** and the checkmark will appear beside it.

If you choose to receive emergency advisory alerts, you have the option of deciding if you want to hear an advisory tone or no tone when one is received. Turn this to **On** in order to receive the advisory tone.
Critical Alerts will sound regardless of what you have chosen here.

Turn the **Override Silent Mode** to **On** in order to receive alerts even when your phone is on vibrate or Do Not Disturb

Click on **Advanced Advisory Settings** if you want to receive advisory alerts for certain events. If you want to receive All advisory alerts, then leave this as is.

Click on **Frequently Asked Questions** to see a list of frequently asked questions about the app or why you did not receive an alert.

Enter the name of the community that you would like to have in your settings. Enter **Saskatchewan** to receive notifications for the whole province. Other examples:

Biggar:

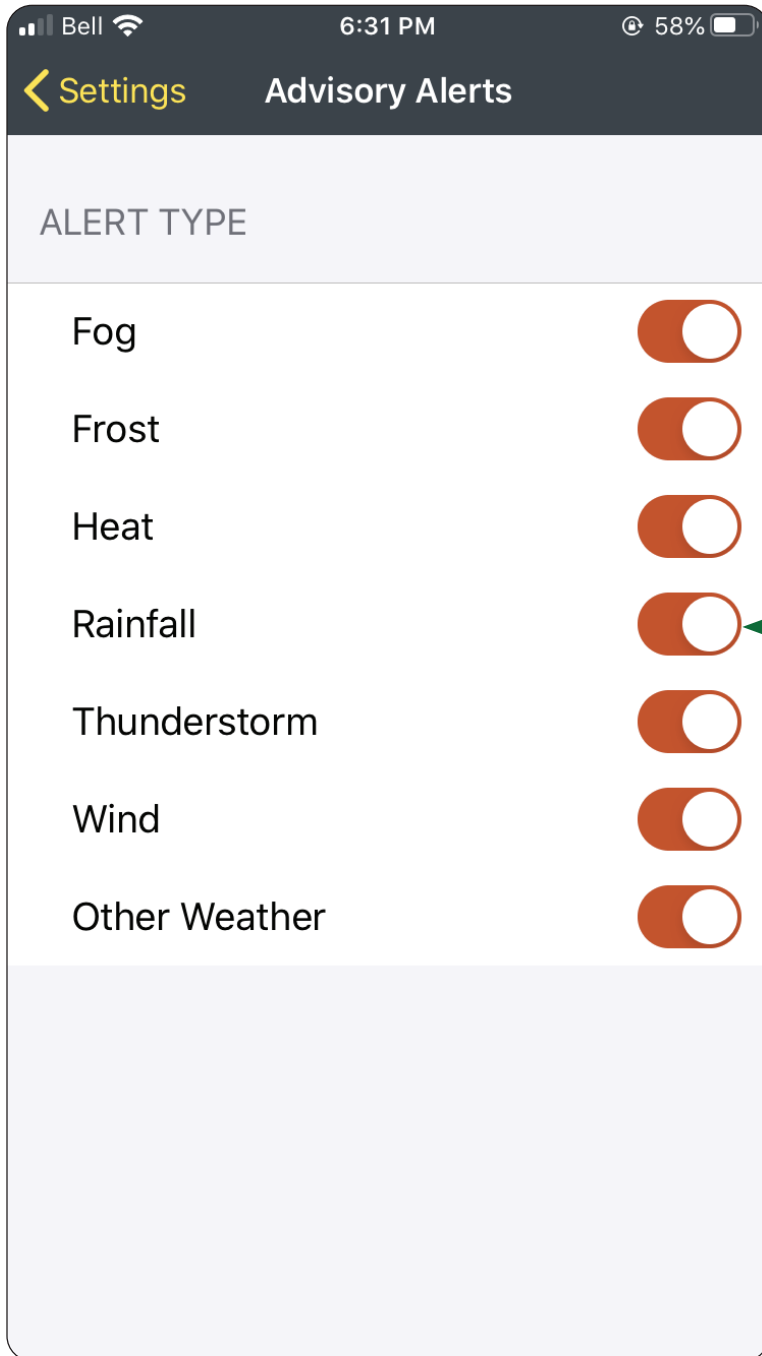

Enter Biggar to have the option to select Biggar No. 347 for the RM of Biggar or Biggar, SK for the town.

Ministikwan First Nation:

Enter Ministikwan to have the option to select Ministikwan 161 or Ministikwan 161A.

Moose Jaw:

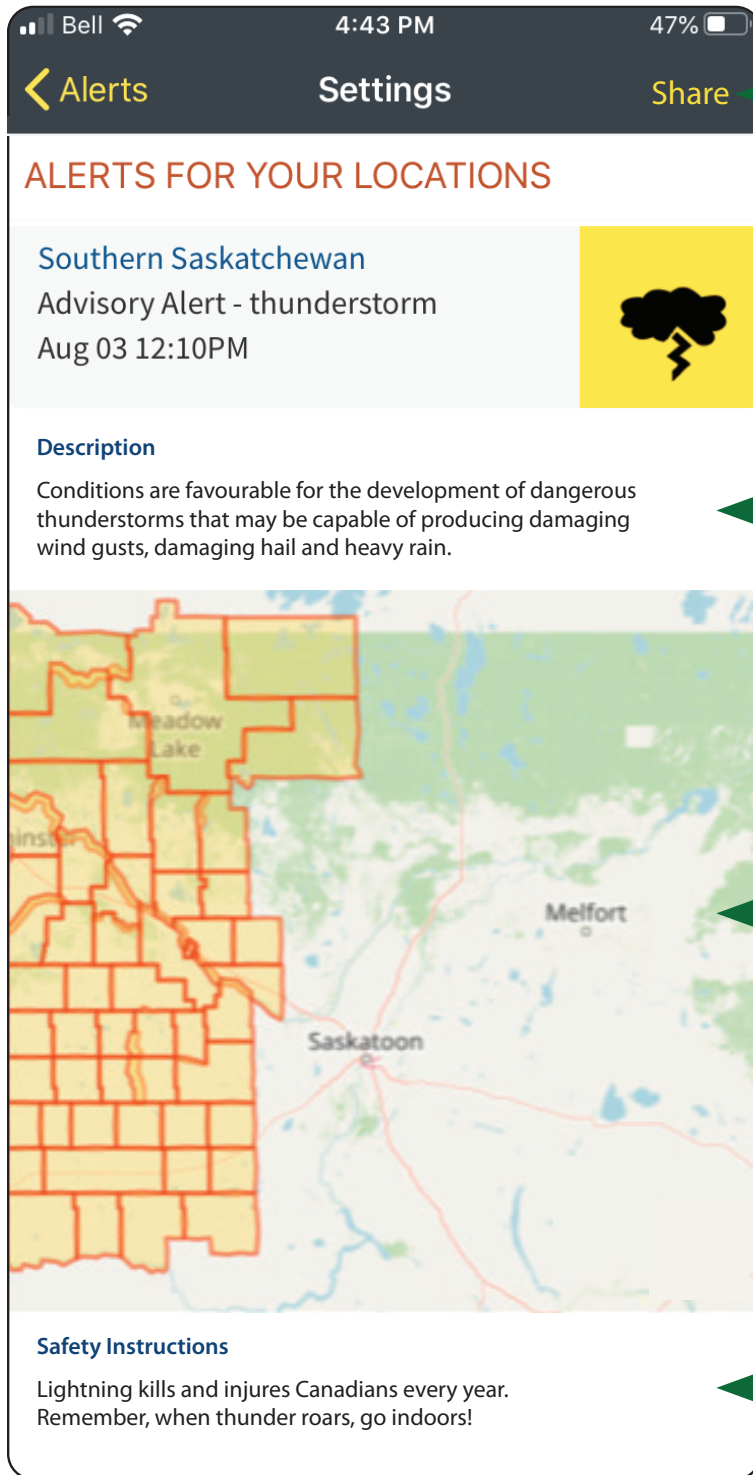

Enter Moose Jaw to have the option to select Moose Jaw No. 161 for the RM of Moose Jaw or Moose Jaw, SK for the city.

If you want to receive all of these advisory alerts types, then leave them all turned to On.

Note: There is no option to turn off Critical Alerts in the same way that Emergency Advisory Alerts can be turned off within the app.

Once you have you settings screen completed, touch the word **Alert** at the top left of the screen to go back to the **Emergency Alerts** screen.

Touch the **Share** icon to forward the alert.

If the alert's description exceeds four lines, a down arrow will appear. Touch the down arrow to read the entire alert.

You can zoom and pan the map through touch:

- Zoom in/out by performing a pinch-pull action.
- Pan left/right by touching the map and moving your finger left to right.

Important instructions will appear here. Watch these closely to stay safe.

App Updates

In order to receive alerts properly, both your phone's software and the SaskAlert App must be updated with the most current version available.

When a SaskAlert App update is available, it will display in the App store under the updates tab.
